

Compatibility

Updated 12/07/2022

KardiaMobile, KardiaMobile 6L, KardiaMobile Card, and KardiaBand are medical devices that are regulated per federal and international regulations; we rigorously test and validate devices with smartphones and tablets to meet or exceed these regulations before we claim compatibility. We routinely add support for new phones and tablets. Check back if your device is not listed below. Over time certain devices can no longer be supported by AliveCor for various reasons. For a list of previously compatible devices please see [this article](#).
